

Curriculum: European Master in Territorial Development

1. Sem	Research oriented project I, focus spatial planning 15	European spatial development and structural policies 5	Territorial governance for sustainable rural and urban development 5	Choice module 5	30
2. Sem	Research oriented project II, focus mobility 15	Implementation in environmental planning 5	Mobility & connectivity 5	Choice module 5	30
3. Sem	Mandatory study term abroad: you can choose from 1 in 5 universities				30
4. Sem	Master thesis and colloquium				30
→ 120 Credit Points					

Semester 1 (courses are taught by the Leibniz University Hanover)

- Research oriented project I - Focus Spatial Planning (15 CP, LUH):** In a small group of students you work on a problem of territorial development by applying your expertise in a well-founded scientific and methodological way. The result is a report, in which your group describes the research approach and analysis, reflects applied methods and discusses the findings. The results will be presented to the university, to the public or to the target group which the project had dealt with. Aims of the projects are to develop and improve your research methods skills and cope with the challenges of self-developed research.
- European spatial development and structural policies (5 CP, LUH):** In this mandatory module you can deepen your knowledge in the fields of European spatial development policy and structural policy. It includes the European spatial development as well as the mutual impacts of European spatial development policy and national spatial development policy. The aims are the analysis and evaluation of processes, which are influenced by the European spatial development policy or the structural policy as well as the adjustment/application of suitable funding approaches and planning measures in selected city regions and rural regions to promote sustainable development.
- Territorial governance for sustainable rural and urban development (5 CP, LUH):** In this mandatory module you can deepen your knowledge in the fields of planning responsibilities, processes and instruments as well as governance forms in Germany and selected EU member states. The aims are to reflect realistic planning with a focus on the realisation of sustainable spatial development and to apply your knowledge to other contexts.
- Choice Module (each 5 CP, LUH):** see list of modules

List of Choice Modules

I. Choice modules at the LUH	Lecturer
Aktuelle Themen zu Regionales Bauen und Siedlungsplanung (Current Issues in Regional Building and Urban Planning)	Prof. Dipl.-Ing. Univ. J. Schröder Arch. M. Ferretti Ph.D.
Environmental Planning	Prof. Dr. C. v. Haaren Dr. F. Scholles
Gender Studies in Spatial Sciences	Prof. Dr. T. Mölders
Landscape Planning and Ecosystem Services	Dr. C. Albert
Landschaftswahrnehmung, Erholung und Tourismus (Perception of the landscape, recreation and tourism)	Dipl.-Ing. R. Kirsch-Stracke M. Behrens-Egge
Orte und Räume verstehen und entwickeln (Making place and space)	Prof. Dr. B. Zibell
Sounds of the remote future + Excursion to Bologna, Italy	Prof. Dipl.-Ing. Univ. J. Schröder M.A. M. Sc. R. Cappeller
The new Urban Agenda: inclusive and sustainable cities?	Dr. ir. L. Tummers-Mueller
Urban and Regional Planning, Regional Governance	Prof. Dr. R. Danielzyk NN
Wirtschaftsgeografische Theorien (Economic Geographical Theories)	Prof. Dr. R. Sternberg
